INDITION CONTENT MANAGEMENT

AI Site Designer

Feature List — every capability of the AI Site Designer, by area.

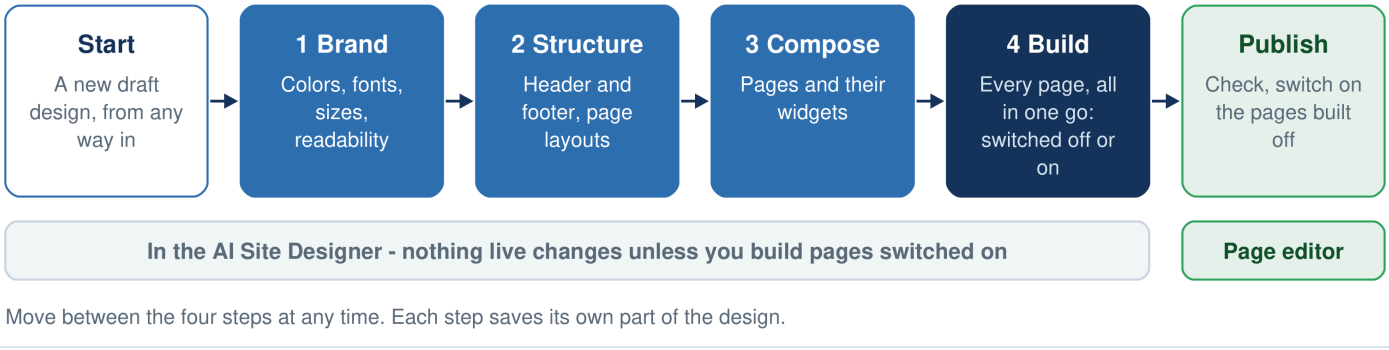
POWERED BY AI

Version V1.0 · November 2026

© 2026 Indition Corp. All rights reserved. Indition™ and the Indition logo are trademarks of Indition Corp. All other product names, logos, and brands are the property of their respective owners.

Everything the AI Site Designer does — from drafting a whole website out of a screenshot or ten live sites, or copying a whole website onto your own widgets, to building it in one go — grouped the way the screens are. Features that use AI carry the AI mark.

Wherever you see this mark, the feature uses AI.



The path of every design. *Start it any way you like, work through the four steps, then build. Nothing on your live site changes until you publish the built pages, or build them switched on.*

The design list

FEATURE	WHAT IT DOES
Design list	Every design with its look, status and last change
New design	Starts an empty draft
Duplicate	Copies any design into a new draft, noting where it came from
Archive	Hides a design from the main list, kept under Archived designs
Delete	Removes a draft; a built design is kept as a record

Ways to start

FEATURE	WHAT IT DOES
Start from this site	A redesign from up to 3 live pages: brand, templates reused as they are, widgets; built as new drafts at new addresses
Start from a screenshot or PDF	AI reads a PNG, JPG, WEBP, GIF or PDF and drafts brand, header and footer, layouts and a first page

© 2026 Indition Corp · Indition™ is a trademark of Indition Corp. All rights reserved.

FEATURE	WHAT IT DOES
Start from Canva	Choose a design and page from the connected Canva account; Canva exports the page and AI drafts brand, header and footer, layouts and a first page
Start from websites you like	Up to 10 addresses, each for its look, its layout or both; pages pictured at computer and phone width, colors and fonts measured, one design drafted
Import from Figma	Frames to layouts and pages, components to widgets, styles and variables to the brand, phone frames to phone behavior
Copy a website's structure	A website's address or one HTML file: page shell, Site Header V5 and Site Footer V5, a layout per kind of page, and its pages three levels deep (home, main menu, category page links), all on native widgets; no AI
Copy exactly	Up to 100 pages instead of 30, and up to 1,000 pictures copied at build
Copied shop, product and blog pages	A page per matching category of your shop and All Products, one product page design (Product Detail V5), and the blog's list and post pages
Copied maps, forms and videos	Your Map widget with a pin, your Contact Us widget, your Video widget; videos copied into the Videos library at build
Copied fonts and links	The page's Google fonts loaded on built pages; links pointed at your own pages
Older widgets	A draft naming an older widget places its V5 version instead
Notice on a new draft	What was brought in, what was left out or changed and why, and what needs fixing

Brand

FEATURE	WHAT IT DOES
Colors	Main, words on main, second, text, page background, dark band, and four message colors
Fonts	Headings, body and fixed-width fonts from a curated list, or the visitor's system font; headings follow the body font unless you choose one
Sizes	Text size, line spacing, content width, spacing and corners as labelled choices
Live preview	Computer, tablet and phone, optionally inside one of your site's templates
Easy to read?	Nine text pairs checked against WCAG AA as you change colors

© 2026 Indition Corp · Indition™ is a trademark of Indition Corp. All rights reserved.

FEATURE	WHAT IT DOES
Use my styling presets	Proposes colors and settings from your site's saved styles, each with its source
Versions	Save as a version, undo changes

Structure

FEATURE	WHAT IT DOES
Template canvas	Page shell, header and footer, and page layouts drawn on a 12-column grid
Layout kinds	Landing page, two column, article, product listing, simple page
Reuse first	Similar templates already on your site offered before a new one is drawn
On phones	Stack, hide or move each area on phones, with a phone view and menu warnings
Area room	Room above, below and at the sides of each area, to two decimals
Dark mode	The canvas follows the admin's dark mode
Describe a page layout	Drafts a layout's areas from a description, shown before it is added

Compose

FEATURE	WHAT IT DOES
Pages	Ordinary pages with their own address, and store pages (product, gift card)
Add a widget	Choose a widget that works there, choose its style (saved styles first), set what it shows
On every page	The header and footer's widgets, filled once
Things no widget can do yet	A list of missing widgets, noted by people and found by AI
Problems	Every issue that would stop a build, shown at the page and area it concerns
To finish	Content left to fill in (a picture, a link, words, a heading) listed apart: it never stops the build
Fill with AI	Suggests widgets for one area from a description

© 2026 Indition Corp · Indition™ is a trademark of Indition Corp. All rights reserved.

FEATURE	WHAT IT DOES
Rewrite with AI	Rewrites a placed widget's words and settings into its form
Add a page from a description	Drafts a whole page: layout, address and widgets
Save safely	Changed-since checks, save as a new version, unsaved work kept in the browser

Build

FEATURE	WHAT IT DOES
Check before building	Every problem grouped by the step that fixes it
What will be created	New templates, new pages with addresses and widget counts, shared widgets, where the brand goes
Things to finish after building	Content to fill in, listed with a link to Compose
Build	Everything in one go, or nothing at all
Switched off or switched on	You choose how the new pages start; store pages always start switched off; your live brand untouched
Pages already on your site	For a copied website's shop, blog and home page: keep, replace (old page kept, switched off) or add the copied look as a new revision
Pictures, logos and videos	Copied into your site's pictures and Videos library at build
The record	A built design lists what it created, which way its pages were built, with links to the page and template editors, each item's state since, and how each copied section was made

Unused templates

FEATURE	WHAT IT DOES
Review	Templates the AI Site Designer made that no page uses: unused for 90 days or more, and newer ones

© 2026 Indition Corp · Indition™ is a trademark of Indition Corp. All rights reserved.

FEATURE	WHAT IT DOES
Switch off / on	Takes an unused page layout out of the template lists, or puts it back
Safe delete	Only when nothing has ever used it, with the reason in words otherwise
Tidy-up card	Appears on the design list when templates have been unused for 90 days

Setup and control

FEATURE	WHAT IT DOES
AI Site Designer switch	On or off for the whole website; while it is off, Settings shows only the switch
AI Site Designer permission	Who can design and build
AI Site Designer: settings permission	Who can switch the AI Site Designer on and off, and connect Canva
Use AI permission	Who can use AI features
Per-feature AI switches	Each AI feature on or off for the whole website
AI spending limits	Every AI feature counts against the website's daily limits
Page-picturing service	Run by Indition on a separate, isolated server for Start from websites and Copy a website's structure, and set up for each website by Indition: nothing to install, no address or key to type
Figma connection	One account connection, managed by the people who manage AI Settings
Canva connection	One Canva account per website, connected through Canva's own sign-in page; tokens stored scrambled; one registered return address can serve many sites
